Training munition, esp. tracer bullet - giving improved target pattern and reduced loading of pistol, with propellant charge sleeve in shell casing  
C91-149775

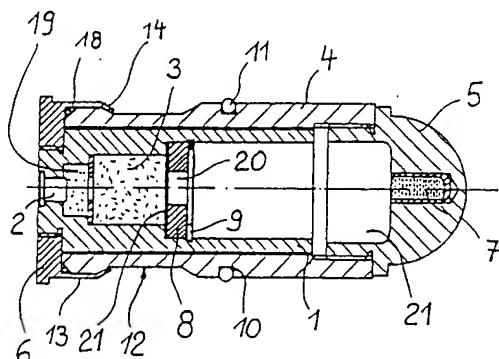

Training munition, esp. a 40 mm calibre tracer bullet, has a propellant charge sleeve (1) with an ignition cap (2) and a propellant charge (3), a shell casing (4) with a bullet tip (5), and a seal between the sleeve (1) and the casing (4).

The sleeve (1) is located inside the casing (4), extends to the sleeve base (6) and has, in front of the propellant charge (3), a cavity which is open to the bullet tip (5).

#### ADVANTAGE

The design avoids overloading of the pistol and leads to a improved target pattern.(7pp1501RKMHDwgNo1/4)
